

USE INSTRUCTIONS

Shoe Inn™ Fusion

1. Place ball of shoe on metal plate.
2. Angle heel slightly downward in order to catch the back of the shoe cover.
3. In one continuous and smooth motion, slide shoe backwards until shoe cover is released.
4. During Step 3, your shoe should be level—**NOT** angled with toe pointing up and heel pointing down—and should not touch the ground until the shoe cover is released.
5. Repeat for other shoe.

After doing this a few times, putting shoe covers on with a Fusion should be very easy!
